Texas Economic Outlook: Strong Growth Continues
National Economy Growing Strongly

- Jobs grew 1.5% in 2017 and 1.7% so far this year, while real GDP growth picked up from 2.5% to about 3.1%.
- Manufacturing, construction and mining job growth strong but retail weak.
- Labor market below full employment at 3.7% unemployment rate.
- Inflation has been lower than expected but is picking up.
- Jobs and RGDP growth expected to hold steady in coming quarters.
- Tax reform may have added .3 to 1.0 percent to GDP growth this year (with reduced growth later) – but trade uncertainty likely reduced growth somewhat.

Texas Economic Growth Accelerating This Year

- In five years prior to 2015, growth in energy, construction and exports provided a strong stimulus to Texas.
- In 2015 and 2016, low oil prices and strong dollar reduced job growth – but Texas did better than other energy states.
- Last year energy and manufacturing sectors began to recover and overall job growth picked up from about 1.2 percent to 2.1 percent.
- So far this year energy and manufacturing have accelerated and job growth will likely be close to 3.0 percent in 2018.

SOURCES: Bureau of Labor Statistics; National Oceanic and Atmospheric Administration; authors' calculations.
Harvey had Different Impacts Along Gulf Coast

Index, Jan. 2013 = 100

SOURCE: Bureau of Labor Statistics; Texas Workforce Commission; adjustments by Federal Reserve Bank of Dallas
In 2015 and 2016, Texas weakened sharply but continued to grow - did much better than 1980s and better than other energy states.

In 2017 energy and manufacturing sectors rebounded.

Texas grew strongly in first half of this year but began to slow slightly in Q3 (3.1 to 2.4) but remains strong – likely will grow about 2.7 percent for the year.

Early for 2019 – but likely 2.0 – 3.0 percent – labor market tightness in unknown territory.

 Corpus Christi growing strongly with strength in the energy sector and Harvey rebuilding

Biggest risk to the forecast is sharp decline in oil prices.
